Materasso

For moments that matter...

MATERASSO Slovakia, s.r.o.

A company with a long-standing tradition

Over 30 years on the path to a satisfied customer. For more than three decades, we have consistently pursued our goal – full customer satisfaction. During this time, we have managed to gain recognition in many European and global markets.

By following the latest research in the field of healthy sleep and implementing the results into our production process using state-of-the-art technologies, we offer products of high utility value. To ensure the highest comfort and long-term stability of our products, we exclusively use certified materials of the highest quality, supplied by leading European manufacturers.

We also attach great importance to ecology – both in the selection of materials and throughout the entire production process. Production is carried out in accordance with the ISO 9001 standard. Our goal is to constantly support the modern individual, who is exposed to numerous negative factors of a modern lifestyle, in achieving the best possible rest, relaxation, and recovery of strength.

Our company uses SIMALFA, a revolutionary, patented, natural Swiss adhesive. This adhesive is completely eco-friendly and meets even the strictest health and safety standards.

The products of MATERASSO Slovakia, s.r.o. comply with the essential requirements of the EU directives under the New Approach, covering issues relating to safety in use, health protection and environmental protection. The catalogue collection includes mattresses classified as medical devices.

Mattress cover

enviro

The ENVIRO cover was developed as a modern response to today's environmental challenges.

It combines technological innovation with premium-class sleep comfort. Thanks to intelligent moisture regulation, hydrophilic properties, and an antistatic finish, it creates a fresh, dry, and pleasant environment throughout the night.

Its fibers are produced using advanced upcycling technologies that transform marine plastic into high-quality, next-generation textile fibers.

ENVIRO is proof that premium comfort, modern materials, and a responsible approach to nature can exist in perfect balance.

Sleep clean

The ENVIRO mattress cover transforms ecological responsibility into exceptional sleep comfort.

COVER: ENVIRO – weight 320 g/m², quilted with high-resilience foam – 2 cm + quilted with 100 g/m² conditioning fiber; on the other side quilted with 300 g/m conditioning fiber

Contributes to reducing water pollution and reduces the carbon footprint.

Environmentally friendly product.

Has antistatic properties.

ENVIRO concept

Sleep that cares about the future

Mattresses created within the Enviro concept – both foam and pocket spring – are produced with ecological solutions and responsible resource management in mind. The use of environmentally friendly materials and efficient production processes helps reduce the carbon footprint and environmental impact, while maintaining the high standard of comfort and durability characteristic of the Materasso brand.

Enviro mattresses have been designed to create a healthy and clean sleep environment, free from unnecessary chemical burdens, while reflecting a modern, sustainable lifestyle. Every mattress in the ENVIRO concept is proof that responsible choices today mean better sleep tomorrow – for us and for our planet – and represents a real step toward a long-term sustainable future.

PROPOLIS

The power of nature for clean and healthy sleep

The PROPOLIS cover is made of a soft and delicate material that is very pleasant to the touch and ensures high comfort during sleep. It is enriched with natural propolis extract – a substance known for its antibacterial, antiviral, and anti-inflammatory properties. Thanks to this, the cover helps maintain a hygienic environment and reduces the risk of bacteria, mites, and mold.

PROPOLIS naturally supports healthy and peaceful sleep, helps protect the skin from irritation, and is suitable even for people with sensitive skin or allergy sufferers. Therefore, this cover is the ideal choice for anyone who values cleanliness, health, and comfort in their bedroom

Mattress cover

avocado

Miracles of nature

AVOCADO is a cover fabric inspired by the power of nature, supporting the body's natural regeneration during sleep. The combination of avocado properties with modern textile technology helps maintain an optimal moisture balance and creates ideal conditions for peaceful, uninterrupted rest.

The delicate and soft-to-the-touch surface ensures high comfort in contact with the skin, while the breathable structure effectively regulates temperature throughout the night. AVOCADO fabric promotes effective rest, so every morning you wake up refreshed, relaxed, and full of energy.

AVOCADO – natural support for your body, night after night.

Properties of the Avocado cover fabric

- helps maintain an optimal moisture balance, creating a fresh sleep environment
- breathable structure ensures better air circulation throughout the night
- delicate and soft surface, exceptionally pleasant to the touch
- high comfort in contact with the skin, also for sensitive skin
- supports the body's natural regenerative processes during rest

Mattress foams

EVO GREEN foam combines nature with modern technology. Instead of petroleum-based raw materials, it utilizes natural castor oil, which has been used in pharmacy for years. This makes it environmentally friendly and brings a touch of nature into your bedroom. Additionally, it is infused with aloe vera extract, which enhances mattress hygiene, limits the growth of mites and bacteria, and provides a delicate, fresh aroma. Its characteristic marbled structure goes hand in hand with high elasticity, resistance to deformation, and a long lifespan. EVO GREEN is an excellent choice for those who value ecology and comfortable, healthy sleep.

viscoGREEN

VISCOGREEN is a natural thermoelastic foam based on castor oil – more comfortable and environmentally friendly than standard visco. Thanks to its elastic structure, it precisely contours to the body and reacts faster to temperature changes, making it easier to change positions during sleep. Additionally, it offers regenerative and antibacterial properties, supporting a healthy and peaceful rest.

NEW IN

Mattress cover

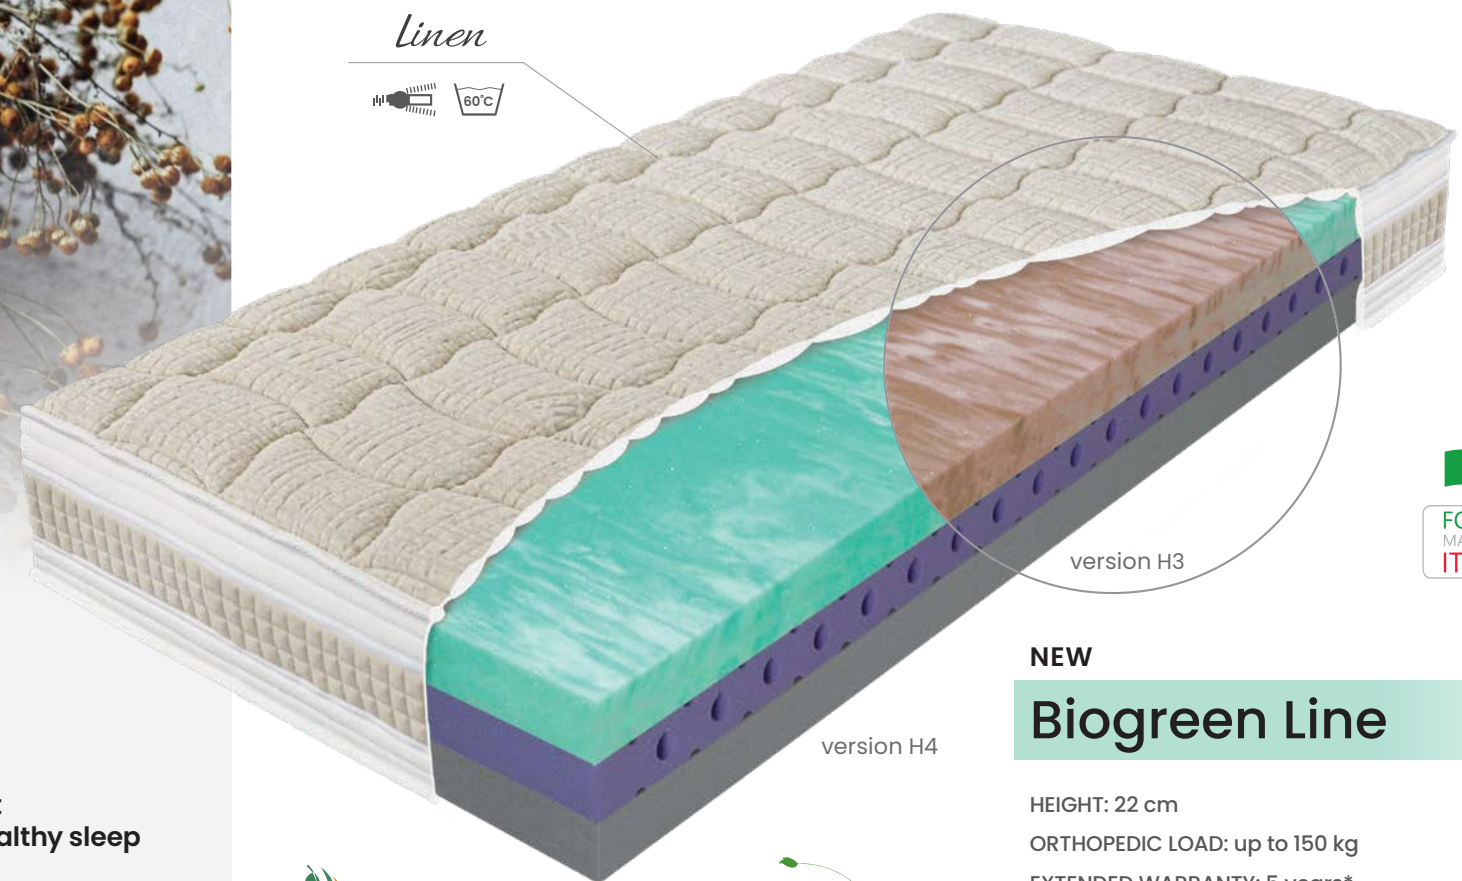

Linen

**Linen cover
– natural comfort
and style for a healthy sleep**

The **LINEN** cover combines comfort, functionality, and elegance.

Thanks to the natural breathability of linen, it regulates temperature – cooling in the summer and retaining warmth in the winter, while preventing excessive sweating. It is hypoallergenic, antibacterial, and ideal for allergy sufferers and those with sensitive skin. It possesses antistatic properties, protects against dust, and naturally inhibits the growth of mold. Linen is durable and over time gains a delicate, massaging effect that improves skin microcirculation.

The **LINEN** cover is an eco-friendly choice with a long lifespan, adding an elegant and timeless character to the bedroom.

A mattress that breathes nature

The new mattress with a linen cover is naturally breathable, antibacterial, and gentle on the skin.

Its core features natural EVO GREEN foam, made from vegetable oils, providing stable and healthy support for the entire body.

However, the heart of the mattress is the specially profiled lavender foam, which not only effectively wicks away moisture and ensures ventilation but also emits a delicate, soothing aroma that promotes deep and peaceful sleep.

THIS IS A MEDICAL DEVICE.
Use it according to the instructions for use or the label.

Special contour cuts that relax muscles and reduce the pressure of spinal vertebrae on the discs.

Spinal Duo and Back Stretch mattresses support the regeneration process of the spine after the rigors of daily life. They feature an innovative system of contour cuts in the middle foam layers. These cuts are grouped into two zones that move apart in opposite directions when the mattress is in use. As a result, the mattress provides gentle stretching of the body during sleep and accurately mirrors natural anatomical curves. This has a very positive effect on the regeneration of intervertebral discs, muscle relaxation, and improved blood circulation.

The bottom layers of the mattresses are made of hard and durable foams that guarantee stable support for the body. The upper layers utilize comfort foams that ensure reduced pressure on the body and provide a pleasant sensation of softness and cradling. The high densities of these foams further guarantee the durability of the mattresses and their resistance to indentation.

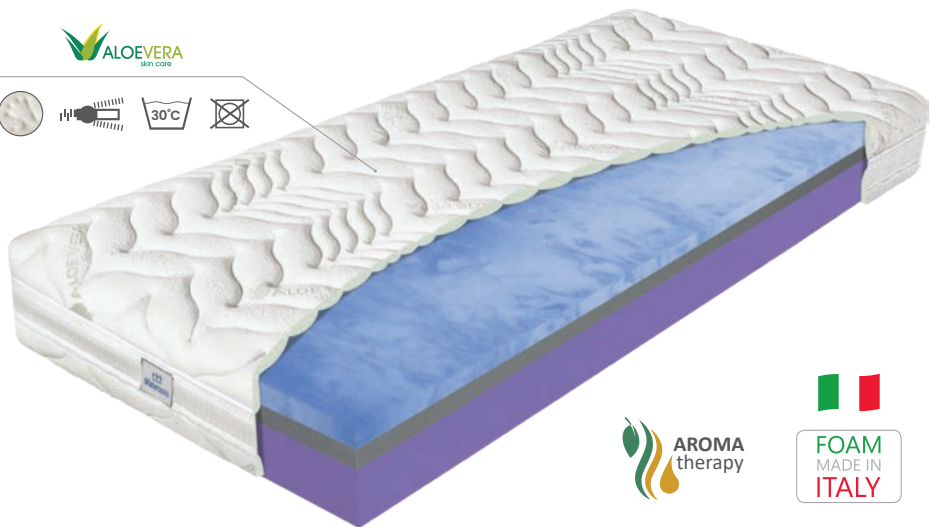

Mattress foams

OXYGEN

OXYGEN is an ultra-modern cold foam with exceptional breathability and elasticity. Thanks to oxygen foaming, it possesses a unique structure of open micro-cells that ensure free air flow and reduce pressure on the body. The mattress provides comfort similar to multipocket springs and thermoelastic foams, allowing for faster falling asleep and deep, regenerative sleep.

Hydro latex

HYDROLATEX is a modern material created by combining comfort foam and latex. It blends the advantages of both raw materials while maintaining natural hardness and exceptional durability. Thanks to transverse perforation, it stands out for its excellent breathability. HYDROLATEX is characterized by one of the longest resistances to deformation among all foams used, even under higher loads. Additional profiling of the Hydrolatex ensures excellent air permeability for the mattress.

Lavender

COCONUT

Mattress foams

Lavender

LAVENDER is a modern version of the classic Eliocell foam, enriched with 100% natural lavender oil. It brings a touch of nature and soothing aromatherapy to the bedroom – lavender calms, relieves tension, and supports healthy, regenerative sleep. The foam stands out for its high elasticity and resilience, thanks to which it perfectly supports the body across its entire surface. Its ecological biocomponents and resistance to allergens, mites, and mold ensure a clean and safe sleep environment, while its high density guarantees durability for years to share.

HR FOAMS

HR (High-Resilience) foams („cold foams“) with an open-cell structure ensure excellent ventilation and a fresh sleep microclimate. They stand out for their high point elasticity and resilience, perfectly contouring to the body and offering stable support and high comfort throughout the night.

BEAST & BEAUTY
collection

The extremely comfortable, resilient, and durable **BEAST & BEAUTY** collection was created in collaboration with professional athletes. These mattresses are ideal for active individuals; they reduce muscle tension, support regeneration, and help achieve the balance and concentration needed for success and life satisfaction.

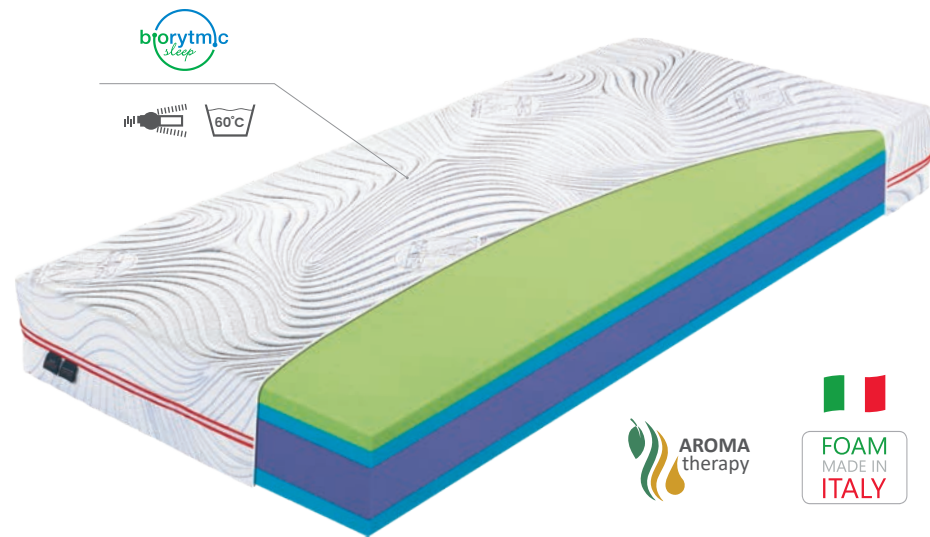

Mattress foams

Neroli

Spanish **NEROLI** foam – durable and comfortable, enriched with natural orange blossom oil. The oil has a relaxing effect, supports circulation, and speeds up falling asleep, ensuring healthy and regenerative sleep.

Modern **ANTIBACTERIAL** foam with **SANITIZED** technology effectively limits the growth of bacteria, mold, fungi, and mites. It ensures a high level of hygiene, protects against allergens, and creates a healthy, clean sleep environment.

A unique mattress designed for maximum regeneration and exceptional durability. The core is impregnated with natural lavender and neroli blossom oils, which soothe the mind, support regeneration, and relieve nervous tension.

Materasso

Mattress foams

Collagen

COLLAGEN – a combination of innovation, health, and beauty. Its structure combines the resilience of classic foams with the precise adaptation of Visco, thanks to which it perfectly contours to the body, relieving the spine and joints. The foam has been enriched with Natural Sleep Fragrance from natural essential oils, which have a soothing effect and support regeneration during sleep. Additionally, it is hypoallergenic, ensuring a clean and healthy environment every night.

GREENGEL

Modern **HR GREENGEL** foam brings arctic freshness to the bedroom, enhancing sleep comfort. Its special structure ensures excellent ventilation, limiting overheating, and works perfectly in combination with thermoelastic foams.

Mattress foam

THERMOELASTIC FOAM

Thermoelastic foam, also known as viscoelastic foam, reacts to body pressure and heat, allowing it to perfectly contour to its shape. It softens under the influence of temperature, evenly distributing weight and minimizing pressure on the body, which supports correct anatomical alignment and improves blood circulation. Muscles remain fully relaxed, and sleep becomes calm, deep, and regenerative. Thermoelastic foam mattresses are recommended for everyone who expects maximum comfort and exceptional sleep convenience.

Mattress foam

AquaSleep

Italian AQUA SLEEP foam belongs to the „Open Cell Memory Foam“ group, making it exceptionally breathable and preventing overheating during sleep. It provides high user comfort – the mattress gently cradles the body, allowing for full relaxation and a pleasant sleeping sensation similar to waterbeds.

Mattress cover

**It cools when it is hot.
It heats when it is cold.**

The HYBRID AQUA SLEEP mattress offers varied thermal comfort thanks to the use of two different cover fabrics on both sides of the sleeping surface – a summer side and a winter side.

The NORDIC COLD cover is the ideal solution for warm summer nights – it provides a pleasant cooling sensation and is perfect for individuals prone to excessive sweating.

In turn, the ALGUA cover was created for users who prefer a warmer sleep microclimate, guaranteeing comfort and coziness throughout the night.

AIRSPRING

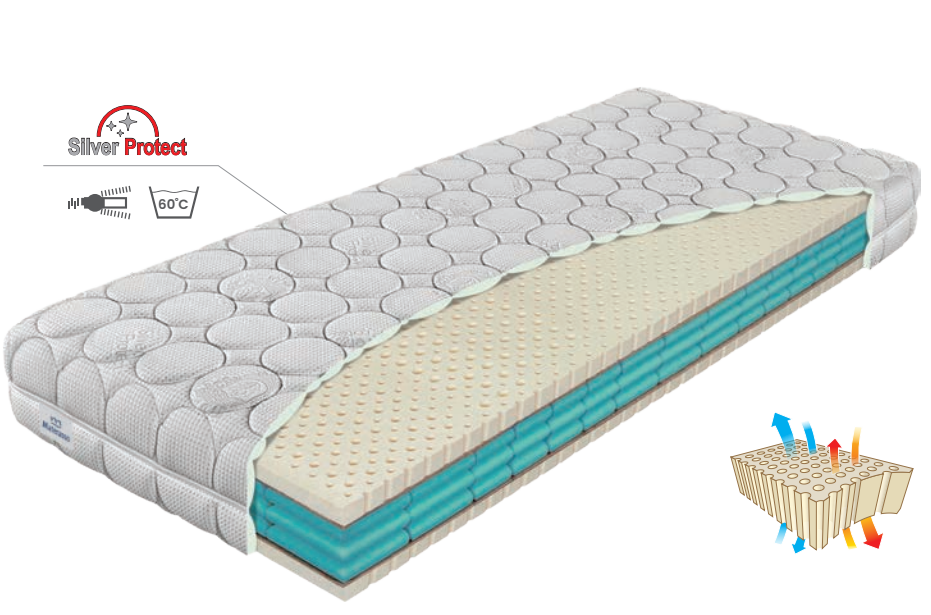

A world-unique, breathable mattress core

- perfect adaptation to the body shape
- exceptional breathability
- high level of mattress hygiene
- long lifespan

Mattress foam

LATEX

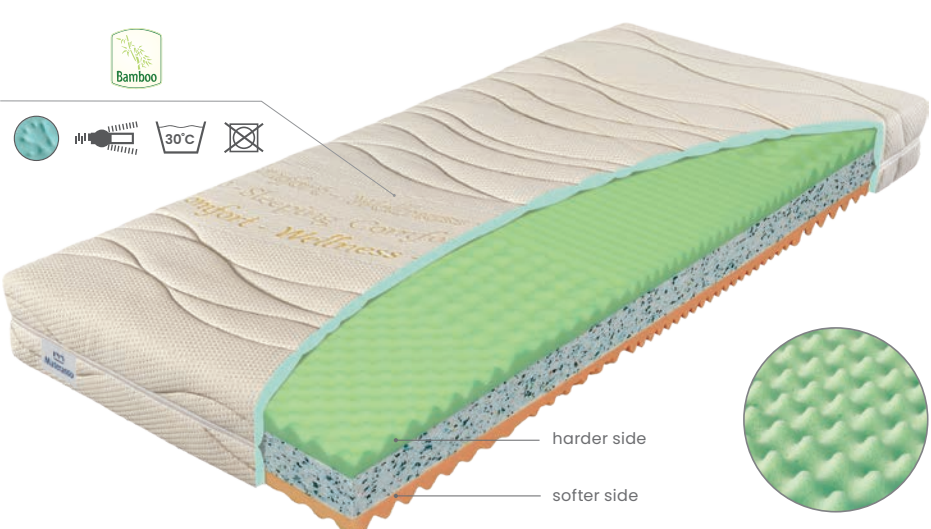

LATEX is a natural material obtained from rubber tree sap, valued for its exceptional elasticity and durability. Thanks to millions of tiny perforations, it breathes and provides excellent ventilation, creating a fresh and hygienic sleep environment. LATEX responds perfectly to pressure, adapting to the shape of the body and offering stable, comfortable support. Its elasticity ensures high comfort every night, while resistance to deformation guarantees long-lasting performance of the core. For the best effect, it is recommended for flexible frames.

Mattress foams

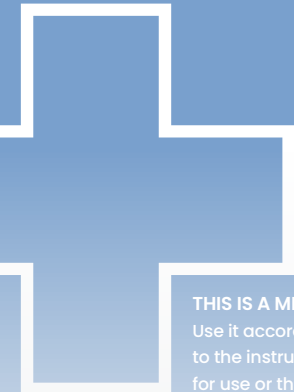

elioacell

ELIOCELL foam is one of the basic materials used in mattress production. Its composition ensures a perfect fit to the body and appropriate resilience. Thanks to the modern quality of the material, it guarantees healthy and comfortable sleep

Nightfly

Italian NIGHTFLY foam is produced using a modern, ecological water-based method, which is safe for the environment and health. It is characterized by high point elasticity, thanks to which the spine is optimally supported. The mattress ensures full comfort and high resistance to deformation.

THIS IS A MEDICAL DEVICE.
Use it according

for use or the label.

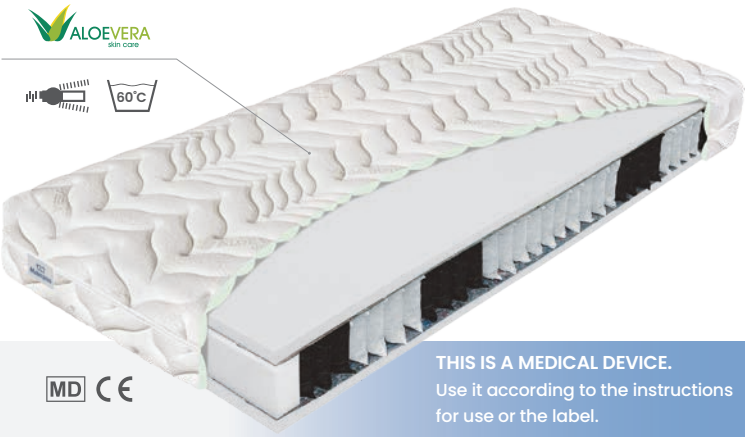

MATERASSO products meet the essential requirements of the EU „New Global Approach“ directives concerning issues related to user safety, health protection, and environmental protection. The catalog collection includes mattresses with medical device status.

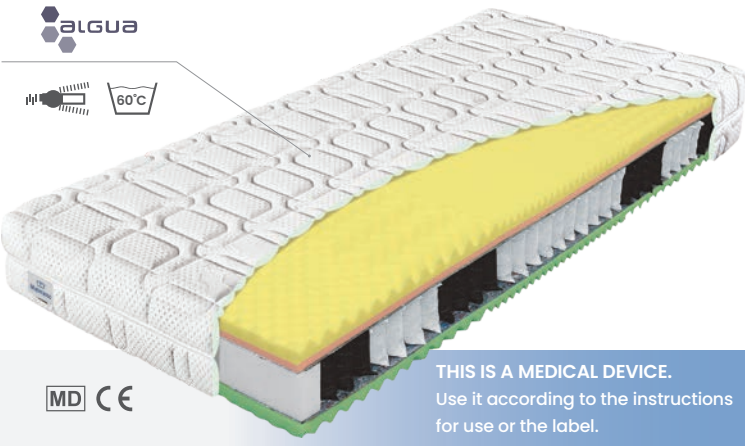

AIR FLOW ventilation system.

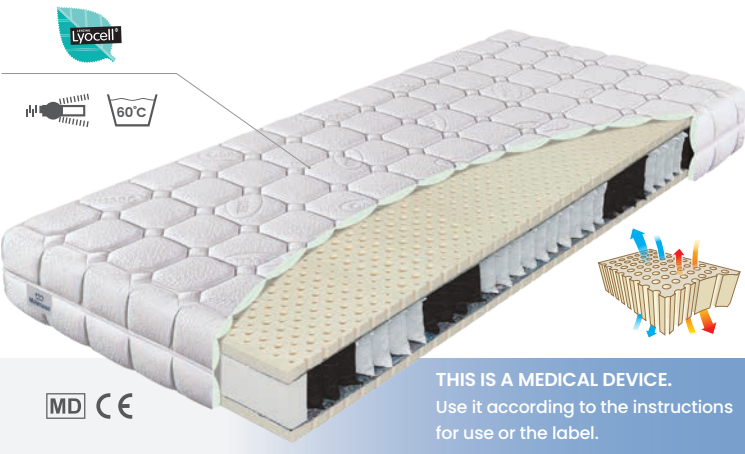

A novelty for hybrid mattresses – **AIR FLOW** ensures excellent ventilation of the mattress core thanks to special openings in the side walls in the head and foot zones. The free flow of air replaces moisture and „stagnant“ air with a fresh, dry stream, limiting the growth of fungi and bacteria. The system improves the hygiene and sleep comfort of all spring mattresses.

Mattress foams

Black diamond

BLACK DIAMOND foam is a true diamond among mattress foams. This top-class high-resilience material combines exceptional comfort, elasticity, and durability, ensuring perfect body support for many years. The open-cell structure guarantees excellent ventilation and a dry, hygienic sleep environment. **BLACK DIAMOND** is a synonym for quality and maximum comfort.

chamomile

HERBAL foam is a breathable and flexible high-density HR foam that perfectly contours to the body and maintains its durability for years. Its characteristic marble pattern makes the mattress stand out, while the impregnation with chamomile extract adds anti-inflammatory and soothing properties, supporting healthy and peaceful sleep.

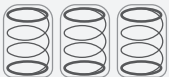

MULTIPOCKET MATTRESSES – SYSTEM 1000

Mattresses with a MULTIPOCKET core offer 1,000 orthopedic points that react independently to body pressure, ensuring maximum comfort and sleep pleasure. They adapt perfectly to the spine and are suitable for both rigid and flexible frames (non-adjustable).

Pocket spring

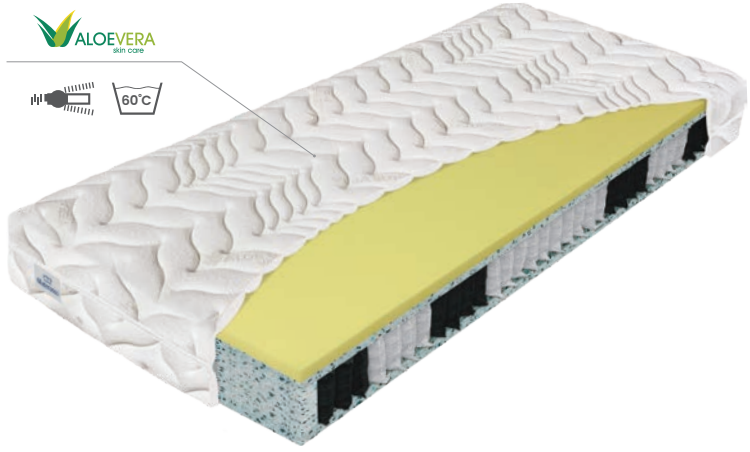

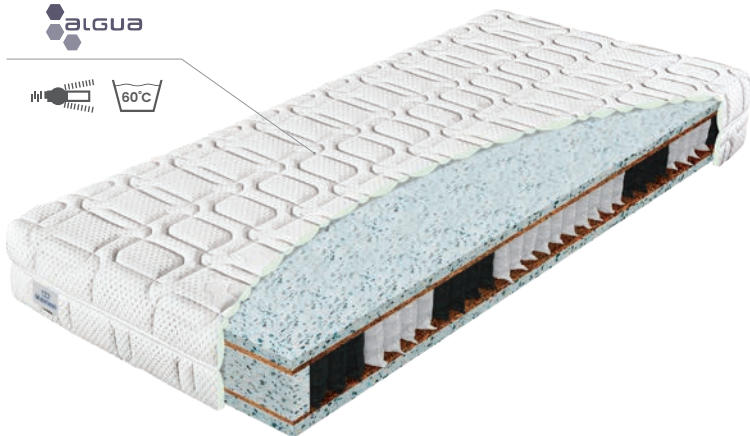

Each spring is placed in a separate pocket, thanks to which the mattress adapts perfectly to the shape of the body and the spine. Pocket models are equipped with 350 to 1,000 springs, creating seven hardness zones (Physiosystem) for maximum sleep comfort. These mattresses work excellently with both rigid and flexible frames, offering stable and orthopedic support across the entire surface.

Mattress foam

visco chamomile

VISCO CAMILCA is an innovative memory foam with an open structure that ensures high comfort, great breathability, and better heat regulation. It contains natural chamomile extract with soothing and anti-inflammatory properties, thereby supporting healthy and peaceful sleep. A mattress with VISCO CAMILCA foam offers a perfect fit to the body and a gentle, natural relaxation effect.

Pillow, duvet

The duvet and pillow are made of anti-allergic materials with a classic layered construction.
The soft, non-irritating cover is pleasant to a child's delicate skin.
Washable at temperatures up to 60°C.

Pillow Baby

Pillow made of high-quality LAZY-FOAM thermoelastic foam with perforation for better air circulation.

Children's mattresses

Comfort is not the only important parameter when choosing a mattress for young children. Children's mattresses must be breathable and must not have zone divisions, which negatively affect the condition of a child's spine. We have prepared a collection of children's mattresses so that you can choose the very best for your child. Both the standard materials and the products used in the production of our children's mattresses are made of unique, high-quality natural foams. All covers are removable for washing to ensure the highest level of hygiene for our children.

Mattress toppers

Mattress toppers can save a mattress that is too hard from being replaced or significantly improve the comfort of sleeping on a sofa bed.

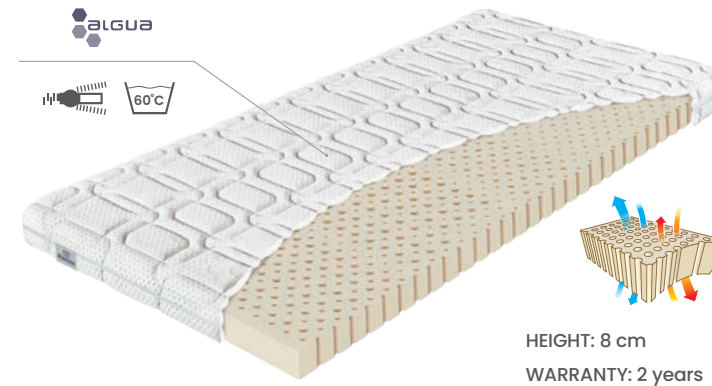

Ensure a comfortable sleep – wherever you are. A topper effectively improves the properties of uncomfortable mattresses, while simultaneously serving as a practical spare mattress for guests that you can easily lay out on a sofa.

In our offer, you will find toppers made of various materials and in various heights. A soft topper perfectly distributes body weight and provides optimal support for the spine, while the medium-hard version stands out for its elasticity and durability. The choice is yours. The removable cover is washable at 60°C, guaranteeing easy care and a high level of hygiene.

Top Lateks

Luxurious mattress topper.

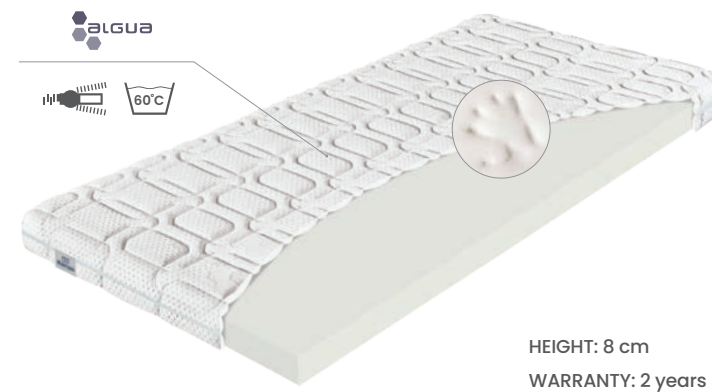

REMOVABLE COVER: ALGUA, quilted with conditioning fiber – weight 200 g/m²
• topper core: latex plate – 6 cm

REMOVABLE COVER: ALGUA, quilted with conditioning fiber – weight 200g/m²
• the topper core is made of 6 cm thermoelastic foam

Climatic

Duvet designed for use on summer and hot days. It has thermoregulating properties and is light and breathable to the touch. Its unique properties will satisfy even the most demanding customers. The duvet is filled with Hollow-Fill fiber. Weight: duvet – 200 g/m², pillow – 1,000 g/m²

Termo

Summer duvet, designed for sleep during hot summer days. It is characterized by its lightness and excellent adherence to the body. It provides perfect coverage by contouring to the shape of the body. The duvets are filled with Hollow-Fill hollow fibers. Weight: duvet – 2 x 150 g/m², pillow – 1,000 g/m²

Klasik / Klasik Duo

Summer–winter version duvet. Klasik – summer version, Klasik Duo – winter version. This light, breathable duvet perfectly wraps the body and ensures a feeling of comfort. The duvet is filled with Hollow-Fill fiber. Weight: Klasik – 2 x 200 g/m², Klasik Duo – 2 x 300 g/m², pillow – 1,200 g/m²

Allergena

Duvet made of anti-allergic fiber, featuring antibacterial properties. Designed for people prone to allergies and sensitivities. Thanks to the possibility of washing at 95°C, it guarantees high hygiene standards and protection against bacteria and dust mites. The duvet is filled with Hollow-Fill fiber. Weight: duvet – 2 x 200 g/m², pillow – 1,200 g/m²

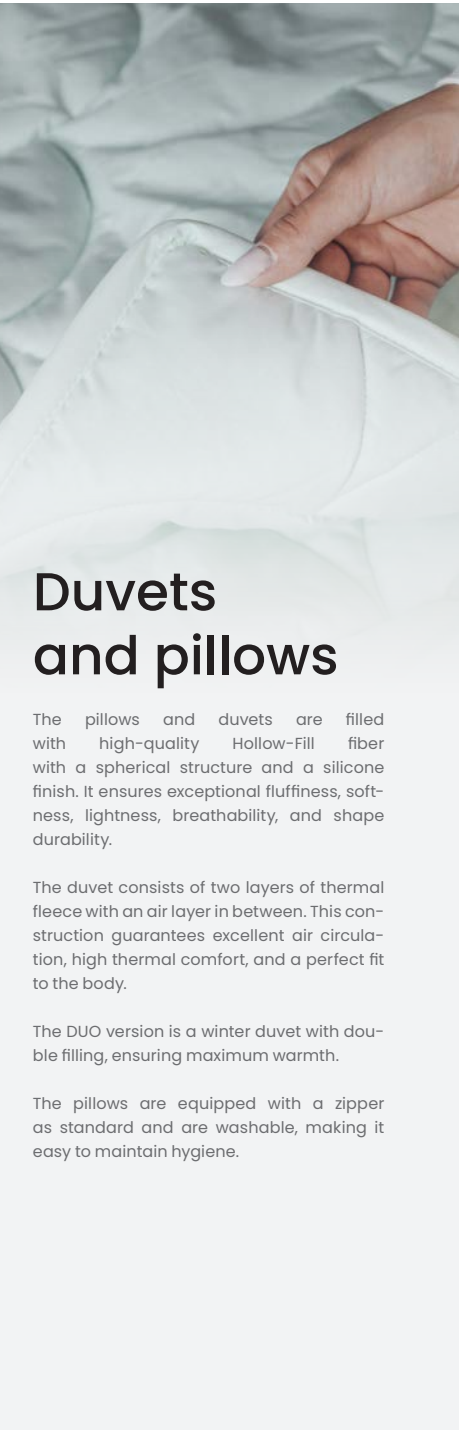

Klasik Twins

An extraordinary advantage of the Klasik Twins version duvet is the possibility of combining it into two duvets designed for cold winter nights and separating it into two parts for warm summer evenings. It is highly functional. This is an original way to combine products for summer and winter. The light and breathable Klasik Twins duvet is the ideal product for customers who value interesting and imaginative solutions. Weight: two duvets – 2 x 200 g/m², pillow – 1,200 g/m²

Aloe Vera / Aloe Vera Duo

The Aloe Vera version duvet is a product designed for those who value the natural and unique properties of Aloe Vera. The extract of this medicinal plant contained in the fabric has health-promoting, skin-care, antibacterial, and relaxing effects. Aloe Vera Duo is the winter version. The duvet is filled with Hollow-Fill fiber. Weight: Aloe Vera – 2 x 200 g/m², Aloe Vera Duo – 2 x 300 g/m², pillow – 1,200 g/m²

Duvets and pillows

The pillows and duvets are filled with high-quality Hollow-Fill fiber with a spherical structure and a silicone finish. It ensures exceptional fluffiness, softness, lightness, breathability, and shape durability.

The duvet consists of two layers of thermal fleece with an air layer in between. This construction guarantees excellent air circulation, high thermal comfort, and a perfect fit to the body.

The DUO version is a winter duvet with double filling, ensuring maximum warmth.

The pillows are equipped with a zipper as standard and are washable, making it easy to maintain hygiene.

Mattress protectors

To avoid worrying about the condition of your mattress, it is worth using a mattress protector. It covers the upper surface and effectively protects against spilled drinks, stains, and other unforeseen situations.

Just as you protect your phone with a case or your car with a protective coating, you should not neglect the protection of your mattress. The protector is always the first barrier – if necessary, it can be easily removed, washed, and put back on, while the mattress remains intact.

In our offer, you will also find waterproof protectors for children, which guarantee a dry mattress in every situation. It is a practical and cost-effective investment that effectively protects your valuable mattress. Choose a protector perfectly suited to your needs.

WARRANTY: 2 years
Standard dimensions of the protectors:
80 / 90 / 160 / 180 × 200 cm

6 types of materials

NEW Propolis

The protector is made of a soft fabric with propolis. Thanks to the natural properties of propolis, it helps maintain the cleanliness and hygiene of the environment.

NEW Linen

The protector is made of natural linen, which naturally regulates temperature. It is resistant to mold and is characterized by high durability.

NEW Carbon

Mattress protector with carbon fibers – permanent protection against electromagnetic radiation and electrostatic discharges with antibacterial properties.

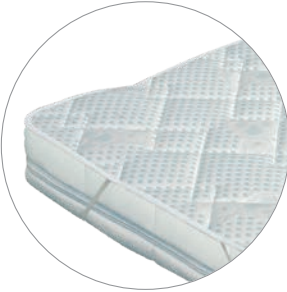

Domestic

Recommended for allergy sufferers due to its suitability for frequent washing. We created it for you with increased hygiene in mind. 100% cotton protector – quilted. Filled with conditioned polyester fiber.

Clinic

This protector is made of waterproof material. It protects the mattress from various types of contaminants and liquids. It is suitable for everyday use in our homes as well as being preferred in healthcare facilities.

Bambi protect

The mattress protector consists of two layers – an upper absorbent layer and a lower waterproof layer. BAMBI – a pleasant-to-the-touch fabric on the top of the protector. CLINIC – a waterproof fabric on the bottom layer of the protector.

WARRANTY: 2 years
DIMENSIONS: 70 × 40 × 16 cm

6 types of materials

Adapti Sleep

Harder pillow with PUR foam filling, offering stable support for the neck and head and high resistance to deformation – ideal for sleeping on the side and back.

Adapti Visco

VISCO foam pillow with adjustable height and hardness, adapting to various sleeping positions, with ergonomic support for the neck and head.

Adapti Latex

LATEX foam filled pillow providing natural elasticity, high breathability, and hygienic properties, with solid and stable support throughout the night.

Adapti Greengel

GREENGEL foam pillow providing exceptional softness, a cooling effect, and higher breathability – ideal for a fresh and comfortable sleep even on warmer nights.

Adapti Aqua

AQUA SLEEP foam pillow with increased breathability and quick response to pressure, created for fresh sleep and optimal thermoregulation.

Adapti Honey

VISCO HONEY foam pillow with natural extracts of propolis and honey aroma, featuring natural antibacterial and hygienic properties for a healthier sleep.

Adapti anatomical pillows

INTELLIGENT PILLOW FOR HEALTHY SLEEP.

An innovative pillow that perfectly adapts to the shape of the neck and head. The interior of the pillow is filled with removable granules, allowing you to easily adjust its height and hardness. Ergonomic support ensures comfort in every sleeping position.

- PILLOW ADVANTAGES:
- one pillow – many adjustment options
 - less tension in the neck and shoulders
 - adjustment in seconds

NEW

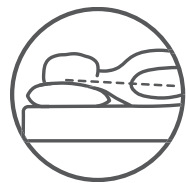

Anatomical pillows

Materasso anatomical pillows are synonyms for convenience and comfort. Their anatomical shapes support the cervical spine and maintain it in an orthopedic position.

A mattress alone is not able to properly secure the cervical spine section without the use of an orthopedic pillow.

We often forget that improper support can disrupt your sleep. In our offer, we recommend 14 models of anatomical pillows.

Two basic pillow models

Shape London

BACK SLEEP

- provides support for the cervical spine
- dedicated to those who prefer sleeping on their back

Shape Paris

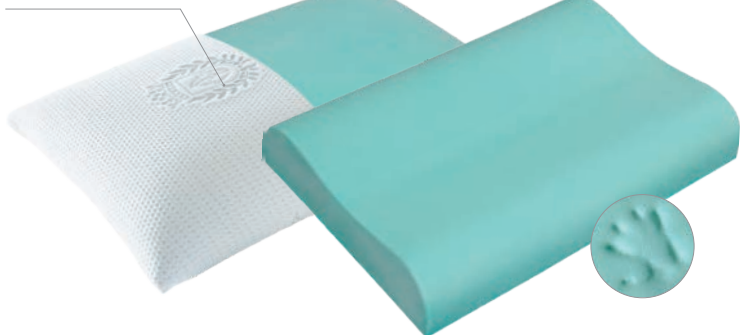

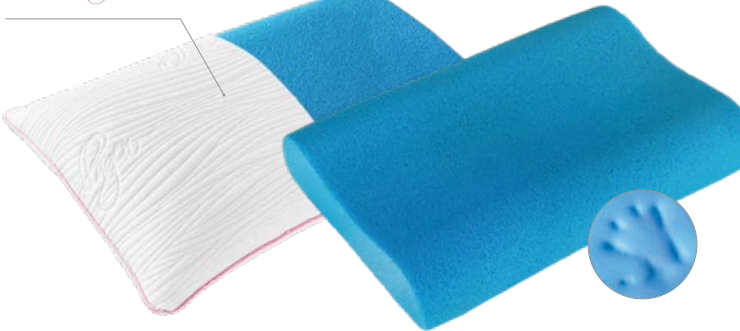

SIDE SLEEP

- provides support for the cervical spine
- designed for side sleepers

All anatomical pillows are equipped with a removable cover that can be washed, which increases sleep hygiene.

PROPOLIS

NEW

Honey London Honey Paris

Removable cover made of ALOE VERA material, washable.

Dimensions: 52 × 30 × 11 cm
Warranty: 2 years

Milano

The pillow is manufactured from LAZY-FOAM, designed for all those who prefer higher head support during sleep. MILANO is a unique-feeling, non-contoured pillow that provides excellent support for the cervical section, even for individuals with a broad chest.

Popular

Manufactured from LAZY-FOAM – it is molded into a form. This technology ensures a perfect fit to the shape of the head, thereby achieving proper orthopedic support. By using this pillow, we receive greater comfort. The pillow is designed for everyday use as well as for travel.

Madrid

A special indentation in the central part of the pillow's edge guarantees excellent neck support, regardless of whether you sleep on your back or on your side.

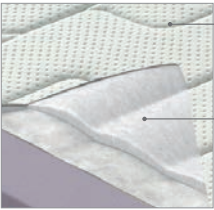

Covers

Mattress covers are an inseparable and extremely important element of every mattress. They influence not only its appearance but, above all, perform a vital functional role. They are responsible for proper thermoregulation, effective moisture wicking, help limit the presence of allergens, and significantly increase overall sleep comfort.

A cover usually consists of three layers: the outer fabric, the filling (PES fiber or visco foam), and the lining. In our mattress collection, you will find a wide selection of covers with additional special finishes (treatments) that emphasize their functionality.

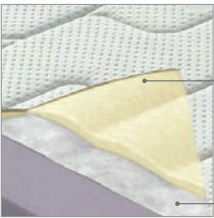

Covers quilted with visco foam increase the sensation of comfort, while non-quilted versions allow for the full utilization of viscoelastic foam properties. Depending on the chosen variant, the cover can be washed only (versions with visco foam – up to 30 °C) or washed and spin-dried (without visco foam – up to 60 °C).

EXAMPLES OF COVER DESIGNS:

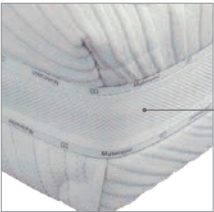

MATTRESS COVER:
outer cover fabric with various types of stitching

POLYESTER FIBER (PES):
thermoregulating filling quilted with the top layer of the cover

LAZY FOAM (visco foam):
in some mattress models, PES is replaced by visco foam

LINING

3D FABRIC:
special 3D fabric for better mattress breathability

PIPING:
a decorative element that highlights the shape of the mattress

HANDLES:
practical handles for easy handling and moving of the mattress

enviro The **ENVIRO** cover is a modern response to today's environmental challenges, combining innovative technologies with premium-class sleep comfort. Thanks to intelligent moisture regulation, hydrophilic properties, and an antistatic treatment, it ensures a fresh, dry, and pleasant environment throughout the night. The fibers are created through an advanced upcycling process that transforms ocean-bound plastic into a high-quality, next-generation textile fiber. **ENVIRO** proves that superior comfort and a responsible approach to nature can go hand in hand.

avocado **AVOCADO** is a cover fabric inspired by the power of nature, supporting the body's natural regeneration during sleep. Combining the properties of avocado with modern textile technology, it helps maintain an optimal moisture balance and creates ideal conditions for peaceful, uninterrupted rest. The delicate and soft-to-the-touch surface ensures high skin-contact comfort, while the breathable structure effectively regulates temperature throughout the night. **AVOCADO** fabric promotes efficient rest, ensuring that every morning you wake up refreshed, relaxed, and full of energy.

PROPOLIS The **PROPOLIS** cover is made of soft, pleasant-to-the-touch material, ensuring high sleep comfort. It contains natural propolis extract – a substance with antibacterial, antiviral, and anti-inflammatory properties. It helps maintain a hygienically clean sleep environment and reduces the risk of bacteria, mites, and mold. Propolis naturally supports healthy and peaceful sleep, protects the skin from irritation, and is suitable for individuals with sensitive skin as well as allergy sufferers. The **PROPOLIS** cover is the ideal choice for anyone who values cleanliness, health, and sleep comfort.

Linen The **LINEN** cover combines comfort, functionality, and elegance. Thanks to the natural breathability of linen, it regulates temperature – cooling in the summer, retaining warmth in the winter, and preventing excessive sweating. It is hypoallergenic, antibacterial, and ideal for allergy sufferers and those with sensitive skin. It possesses antistatic properties, protects against dust, and naturally inhibits the growth of mold. Linen is durable and over time acquires a delicate, massaging effect that improves skin microcirculation. The **LINEN** cover is an ecological choice with a long lifespan, adding an elegant and timeless character to the bedroom.

Collagen Collagen and selenium are active ingredients that support the health and beauty of the skin during sleep. Collagen improves skin hardness and elasticity, while selenium provides antioxidant, anti-inflammatory, and regenerative effects. Together, these substances moisturize, smooth wrinkles, and improve the skin's appearance, supporting its regeneration night after night. The **COLLAGEN** cover with collagen and selenium combines sleep comfort with skincare, providing a luxurious feeling of softness and long-lasting durability. Try it and see how wonderful it is to get a great night's sleep and take care of your beauty at the same time.

biorytmic The **BIORYTMIC** cover combines modern science with traditional Chinese medicine. Made of durable plant fibers with the addition of natural minerals, it supports the flow of energy in the body and proper communication between tissues. It helps reduce stress, improves well-being, strengthens immunity, and promotes deep, restorative sleep. Excellent moisture absorption and the maintenance of a constant temperature provide a dry and comfortable sleep microclimate, acting as a natural spa for the skin. The cover is durable, easy to care for, and can be washed at 60°C, which guarantees hygiene and long-lasting comfort.

algua **ALGUA** – the cover contains seaweed extracts bound in microcapsules. Spirulina, which contains 11 natural vitamins, 10 minerals, 18 amino acids, 3 fatty acids, beta-carotene, iron, and a large amount of antioxidants and proteins. During sleep, these substances are released with a beneficial effect on human skin. This is the „Health & Beauty“ concept, where we undergo wellness therapy while sleeping. The cover is washable at temperatures up to 60°C.

Silver Protect **SILVER PROTECT** – the cover fabric with a special treatment limits the growth of harmful microorganisms and bacteria. The mattress is ionized with silver, which provides an antibacterial effect – after just two hours, it reduces the amount of microorganisms and bacteria by up to 90%, which is why it is recommended for allergy sufferers. The antibacterial effect is certified and effective, and the cover also limits the growth of mold and unpleasant odors. It is washable at temperatures up to 60°C.

NORDIC COLD The **NORDIC COLD** cover's cooling technology provides a pleasant coolness and maintains an optimal sleep temperature throughout the night, even during the hot summer. The hypoallergenic material protects against dust mites, pollen, and other allergens, ensuring a peaceful sleep without skin irritation. The cover is easy to remove and wash, making it easy to maintain hygiene. **NORDIC COLD** is a luxurious and practical solution that invests in healthy, comfortable, and regenerative sleep.

ALOE VERA The **ALOE VERA** cover is a material that supports full regeneration during sleep. Thanks to its content of enzymes, amino acids, and mineral substances, it aids skin renewal, soothes minor irritations, and enhances the relaxing effect of sleep. The material is breathable, gentle on sensitive skin, and possesses natural antibacterial properties, ensuring a hygienic and healthy sleep environment. The cover is washable at temperatures up to 60°C, making it easy to maintain cleanliness and freshness. It can be used for all types of mattresses, providing comfort and protection every night.

Lyocell A material whose properties are preferred for mattress production. Due to its high quality, the fiber is velvety soft, retains its shape well, and has a luxurious character. **LYOCELL** is a 100% natural product with a base made of wood cellulose. The material absorbs and wicks away moisture very effectively and dries quickly, maintaining high mattress hygiene. The cover of the side part of the mattress has been produced in combination with a 3D ventilation belt to improve air conditioning and is washable at temperatures up to 60°C.

Bamboo **BAMBOO** – is a mattress fabric made of natural bamboo fiber, cotton, and polyester. This newly developed material is environmentally friendly and possesses excellent properties suitable for use in mattresses. It is silkily soft and pleasant to the touch. **BAMBOO** naturally isolates microorganisms. The cover is washable at temperatures up to 60°C.

Silk touch **SILK TOUCH** cover – produced using nanotechnology, it has achieved the elegant luster and delicacy of silk. The fabric structure combines exceptional lightness with the fluffiness of the material. This luxurious and pleasant-to-the-touch fabric provides unique and unparalleled sleep comfort. The cover features a unique structure thanks to the use of a high material weight of 600 g/m². The cover is washable at temperatures up to 60°C.

EUCALYSS **EUCALYSS** – is a mattress material with 100% natural Eucalyptus Citriodora extract, possessing excellent properties for repelling bothersome insects. Tests conducted at the renowned Anglet laboratory in France have clearly demonstrated its effectiveness. For even greater comfort, this material is quilted with a layer of memory foam. It is supplied in two versions: a basic one without a zipper and one with a zipper, which is removable; we also produce it with 3D fabric. The cover is washable at temperatures up to 30°C, without the possibility of spin-drying.

Frames rigid, flexible adjustable

Choosing a frame is a very important element when purchasing a mattress. The frame affects the hardness and extends the lifespan of the mattress. In some models of frames, there is an option to adjust the hardness of individual slats. Certain models offer the following solutions: access to a bedding container, manual or electric adjustment of the frame to any relaxing position, or lifting of the headrest or footrest.

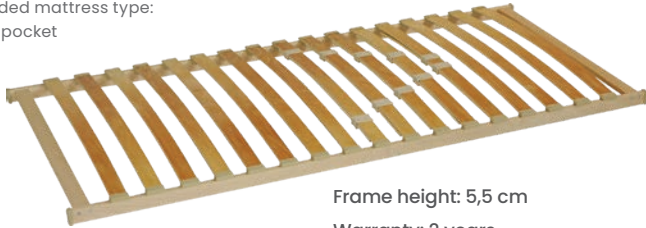

As the first manufacturer in Europe, Materalasso has applied lavender flower oil impregnation in flexible frames. Lavender oil has an effect that repels insects, moths, and mosquitoes. It also has a relaxing and soothing effect on the nervous system.

The FSC® certificate is a reliable monitoring system and a guarantee of the material's origin. The certificate held by the company confirms that the products come only from responsible forest resource management.

Klasik T5

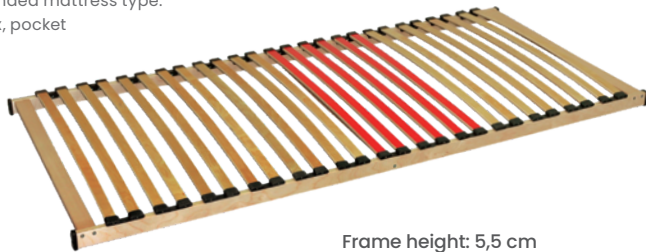

Slat width / quantity: 53 mm / 17 pcs.
Handles: fixed, plastic
Maximum load: up to 110 kg
Recommended mattress type: foam, latex, pocket

Certificates

ISO 9001
Our production processes and quality management are certified to ISO 9001, which confirms that we adhere to the highest standards in the manufacture of mattresses and materials.

TÜV Rheinland CERT ISO 9001
The TÜV Rheinland certificate guarantees that our products meet rigorous quality and safety standards, which is a confirmation of the reliability and durability of our mattresses.

Oeko-Tex Standard 100 – Confidence in Textiles
Our fabrics and covers hold the Oeko-Tex Standard 100 certificate, which confirms the absence of harmful substances for health and the environment. As a result, sleep is not only comfortable but also safe for allergy sufferers and sensitive individuals.

ECO-PASSPORT – Hohenstein Institute
The SIMALFA adhesive used in our mattresses holds the ECO-PASSPORT certificate, which guarantees that it does not contain any harmful chemicals. It is fully ecological and safe for health, supporting environmentally friendly production.

SIMALFA – natural Swiss adhesive
SIMALFA adhesive is completely ecological, water-based, and patent-protected. It contains no harmful substances, meets rigorous health standards (Oeko-Tex Standard 100, ECO-PASSPORT), and is safe even for products intended for infants.
