Materasso s.r.o. is a family-owned company that has been in the market for over 30 years.

In the Czech and European markets, and in recent years also in non-European markets, it is renowned for producing certified orthopedic mattresses, designer beds, interior accessories (such as ottomans, armchairs, and nightstands), and bedding accessories (including duvets, pillows, and mattress protectors).

Thanks to our continuously expanding product range, the use of high-quality materials, adherence to certified manufacturing processes, and excellent after-sales service, we continue to grow our base of satisfied customers—both individual clients and professionals, such as interior designers and hoteliers.

The bedroom is the most intimate and important space in your home.

It is a place of rest and relaxation for both your body and senses after a long day. Here, you regain strength and prepare for new challenges.

We understand that the centerpiece of every bedroom is the bed—it gives the room its soul and character. That's why our bed collection is distinguished not only by a solid construction and perfect craftsmanship but also by beautiful design, a wide selection of upholstery fabrics, and various color options.

Combined with our range of orthopedic mattresses, it provides the ultimate comfort and luxury. We place great emphasis on functionality and the ability to create bed models tailored exactly to your needs.

Thanks to a wide variety of shapes, designs, colors, and additional features, you will certainly find the perfect bed in our collection to complete your interior's style—transforming your bedroom into the coziest place in your home.

We build on a strong team of qualified experts with many years of experience in manufacturing orthopedic mattresses and beds, as well as on the quality of our products.

We offer the possibility to combine various sleeping systems with a rich selection of modern headboards in different designs and finishes.

Our production includes various types of bed frames, featuring either slim or robust side panels, as well as standard and custom-length beds. We also manufacture comfortable box spring beds, widely recognized from the hotel industry.

Customers can choose between beds with or without storage space. The selection of bed slats is also customizable—ranging from classic fixed slats to lift-up or electrically adjustable versions.

We continuously monitor new technologies and trends in interior design. Incorporating these innovations into our production has allowed us to create a comprehensive and aesthetically successful collection of beds and complete bedroom sets.

The design and style of our beds are further enhanced by the use of high-quality upholstery fabrics. Our collection includes not only fabrics with unique patterns and textures but also those with special easy-clean treatments, as well as materials resistant to liquid absorption and dirt.

Every bed in our collection, regardless of its frame type, can be customized with a selection of legs in various materials, shapes, and heights to perfectly match your vision.

Mattress Storage Options:

1. RECESSED MATTRESS SYSTEM:

The mattress is recessed into the bed frame, meaning the outer dimensions of the bed are larger than the mattress size.

This option is only possible with frame beds.

2. CORIUM SYSTEM:

The mattress is placed on a sleeping system (frame bed or box spring), with the outer dimensions of the mattress matching the dimensions of the bed's sleeping system.

BED SYSTEMS

Each bed system can be combined with any headboard and legs. You can choose from a wide range of high-quality upholstery fabrics.

For every bed, you can also order an ottoman, an armchair, or a footrest in the same fabric.

The heights of the sleeping systems are listed without legs. All beds within the children's and teenager program are available starting from a width of 90 cm.

The entire bed frame (excluding the headboard and slats) is packed in a cardboard box, making transport easier and providing better protection during handling.

All assembled joints in frame constructions use metric-thread bolts and nuts, allowing for easy and repeated assembly.

ABBREVIATIONS USED:

- UP – Storage space
- BV – Side lift mechanism
- NV – Foot-end lift mechanism

NEW

BOXSPRING SLIDE

The boxspring is designed with a focus on maximum comfort and functionality. Thanks to the combination of pocket springs and a layer of PUR 35 foam in the top section, it provides optimal sleeping comfort. This combination ensures sufficient body support while maintaining flexibility, contributing to a relaxing and healthy sleep.

This boxspring is an ideal choice for those who appreciate the practicality of an integrated extra bed without compromising comfort. The linear sliding mechanism allows for easy and smooth operation. You can choose the mattress for the extra bed according to your preferences, with a maximum mattress height of 20 cm.

NEW

HIGHLIGHT

The box is upholstered in the same fabric as the bed's headboard, and the sleeping surface of the boxspring features a special ANTISLIP-treated fabric that securely holds the mattress in place, preventing any shifting.

The side panel height of the box is 10 cm.

BOXSPRING 22-32 CM

It is the most advanced bed system. Its popularity stems from its specific construction: the robust boxspring frame surrounds the spring core, providing a point-adaptive foundation under the mattress, improving its conforming properties and overall adaptability. This composition creates an exceptional double-contouring system that follows the natural shape of the body.

The boxspring is upholstered in the same fabric as the bed's headboard, and the sleeping surface of the boxspring features a special ANTISLIP-treated fabric that securely holds the mattress in place, preventing any shifting. The side panel height of the boxspring is either 22 or 32 cm. The mattress is not recessed into the bed frame but sits flush with the boxspring.

BOXSPRING UP LIFT MAXI

The UP MAXI 40, UP MAXI 100, and UP MAXI ELECTRIC are the perfect solution for those looking for a comfortable bed with the advantages of boxspring construction, enhanced by a large storage space within the bed. The boxspring construction minimizes the space requirements in the bedroom, allowing for a larger mattress compared to traditional bed types.

The storage space, without internal dividing partitions, offers an exceptionally large area with excellent access across its entire surface. The UP MAXI 40 boxspring can easily lift a mattress with a total weight of up to 40 kg. For heavier mattresses, the UP MAXI 100 system is designed. It features 4 hardware components and gas springs for easy lifting of the storage compartment lid along with heavy mattresses. The lifting mechanism in UP MAXI ELECTRIC is powered by an electric motor. The boxspring height is 32 cm.

UP WOOD

This bed is designed for those who need more storage space in the bedroom and also prefer a single partner mattress. The bed frame is available in thicknesses of 3, 5, or 8 cm, and heights of 30 or 35 cm.

It is equipped with a construction and slats made of solid beech wood. The frame features a front-lifting mechanism with pneumatic gas springs that make it easy to access the storage space, even with heavy mattresses.

UP METAL

This bed is designed for those who need more storage space in the bedroom and also prefer a single partner mattress. The bed frame is available in thicknesses of 3, 5, or 8 cm, and heights of 30 or 35 cm.

It is equipped with a special slatted bed base with a metal construction, which lifts from the front using hardware with pneumatic gas springs, allowing easy access to the storage space even with heavy mattresses. The metal frame of the slats is fitted with pre-tensioned slats. By removing the base of the storage space, you gain access to the entire area under the bed, which is especially useful for cleaning.

UP METAL LIFT-UP

An upgrade to the UP Metal, the METAL LIFT-UP facilitates access to the storage space at the head of the bed and also greatly simplifies changing the bed linens.

UP BV | UP NV

The designer bed UP BV and UP NV (with adjustable headrests) is equipped with wooden lifting slatted bases. For this bed, it is recommended to use two separate mattresses to fully utilize the lifting slats.

The mattress is recessed 6 cm from the top edge of the side panel when using the METAL, DOBLE NV, and DOUBLE BV slats.

In the Corium version, the slats can be mounted at the height of the side panel's top edge, with the mattress supported by both the slats and the side panels. This configuration gives the bed a boxspring-like appearance, and the bed's width (including the side panels) will match the width of the mattress.

WITHOUT STORAGE SPACE

The designer bed is intended for those who do not require storage space within the bed. The bed frame is similar to that of the UP bed but does not include the attachments for the storage base.

This frame can accommodate all types of slatted bed bases under the mattress, from simple solid slatted bases to slatted bases in a frame, flexible slats, adjustable ones, and even models with continuous electric adjustment. This provides complete comfort during sleep and also for moments of active rest, such as reading. The frames are available in different side panel thicknesses: 3, 5, or 8 cm, and three heights: 15, 30, or 35 cm.

BOXSPRING MOBIL

The bed construction is identical to the Boxspring 22/32, enhanced with the function of continuous adjustment for the head, back, and legs using an electric motor with a controller. This type of bed does not have protruding side panels, and the adjustability allows for the best position for rest. There is a different position for sleeping, another for active rest (e. g., reading), and another for the regeneration of sore legs.

The Boxspring Mobil works ideally with mattresses made from cold foam, with anatomically cut cores, latex mattresses, as well as mattresses made from „lazy“ memory foam. These mattresses precisely conform to the slatted base shape when adjusted.

The boxspring height is 32 cm.

BED SETS, UPHOLSTERY FOR WALLS AND ACCESSORIES

A new feature that is highly appreciated not only by interior designers and hoteliers but also increasingly by regular consumers is the option to order stools, nightstands, armchairs, or ottomans in the same upholstery fabric as the bed.

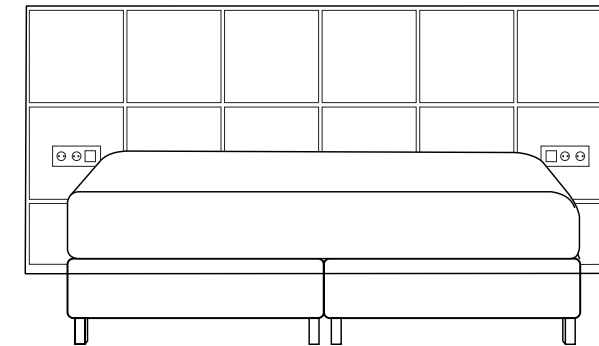

For those who already own a high-quality bed (such as a solid wood bed) and plan to elevate the interior of their bedroom, we offer the possibility to combine individual interior accessories in the same upholstery fabric, either with each other or matching with the upholstered wall behind the headboard. A SET (combination) of the bed and one or all of the mentioned interior accessories in the identical upholstery fabric enhances the overall impression of your bedroom, creating a desired feeling of elegance and luxury, reflecting your unique taste and preferences.
